El ction/R strictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29 and 58 drawn to a method comprising establishing a database of providers, extracting a description of a consumer's need, packaging and presenting a consumer's need, and presenting service providers' responses, classified in class 705, subclass 26.
- II. Claims 30-36, 46-57, 59 and 61, drawn to a method of facilitating commerce between service providers and consumers comprising completing a full loop, by matching consumers to only those pre-qualified service providers who have confirmed their interest in performing the requested service, classified in class 705, subclass 26.
- III. Claims 37-45 and 60, drawn to a method comprising developing a detailed description of the consumer's service needs by receiving consumer input using interactive questions and answer interviews generated by a decision tree based upon currently available information about the consumer's service needs, classified in class 705, subclass 26.

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as completing a full loop, by matching consumers to only those pre-qualified service

providers who have confirmed their interest in performing the requested service. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as completing a full loop, by matching consumers to only those pre-qualified service providers who have confirmed their interest in performing the requested service. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Group I, restriction for examination purposes as indicated is proper.

A telephone call was made to Michael A DeSanctis on July 7, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew s Gart whose telephone number is 703-305-5355. The examiner can normally be reached on 8:30AM to 5:00PM m-f.
